

UNDERSTANDING BUDGET BILLING

HOW DOES BUDGET BILLING WORK?

Budget Billing with Dixie Power is a practical tool to simplify your monthly budgeting, though it doesn't reduce the amount you ultimately pay for electricity. Instead, it ensures your bill is a consistent amount each month, based on an average of your usage over the past year.

BALANCE FORWARD

This is your billed amount from your previous month.

PAYMENT

This shows your total payment amount from the previous billing period.

CURRENT CHARGES

This amount shows the actual charges from the current month. More detail on this can be found in the Current Service Detail box.

ACTUAL ACCOUNT BALANCE

This amount shows the actual balance of your account. This amount will likely grow during the high usage months, and decrease during low usage months.

BUDGET DUE

This is the Budget Billing Amount, and the amount that you are expected to pay to keep your account in good standing.

HOW DOES THE RECALCULATION WORK?

Your Budget Billing amount is calculated by taking your total billing from the previous year and dividing it by 12 to get a monthly average. Your "Actual Account Balance" is divided by 12 and added to the monthly average to determine your new monthly Budget Billing amount. This average is recalculated annually in October.

WHAT HAPPENS IF I MOVE?

If you move or add an additional service to your account, you will be removed from budget billing and any deferred balance remaining will be owed on the next billing date. (You are eligible for budget billing again once you have had service at the new location for a minimum of 12 consecutive months)

HOW DO I QUALIFY FOR BUDGET BILLING?

- Your account must be at a \$0 account balance to be eligible for Budget Billing.
- You have a minimum of 12 consecutive months of billing history at the service address.
- Agree to the Budget Billing terms and conditions.
